YASH BHAVSAR

Game Developer / Programmer

Pune, MH, India +91 9503354113 yashbhavsar.dev2007@gmail.com LinkedIn GitHub Portfolio

Education

Dr. D. Y. Patil College of Engineering, Akurdi, Pune **2025 - 2028**
B. Tech in Artificial Intelligence & Data Science *Current CGPA - 8.84/10*

Government Polytechnic, Chh. Sambhajinagar **2022 - 2025**
Diploma in Artificial Intelligence & Machine Learning *Percentage - 92.80%*

Experience

Ram XR **[GitHub]** **April 2026 - May 2026**
Unity VR Developer Intern *On-site*

- Led a 6-intern Unity team on a veterinary canine simulation: defined the implementation pipeline, assigned tasks, and clarified deliverables
- Built VR interactions (object grabbing and snapping) using Meta SDK and Unity XR Interaction Toolkit
- Developed the VR environment with baked lightmaps, world-space UI panels, and controller input mapping

AZYMAR **[LinkedIn Post Video]** **March 2026 - April 2026**
Unity 2D Developer Intern *Remote*

- Co-developed "Old Raman House", a Granny-inspired 2D side-scroller horror game, in a team of 2 interns
- Built the hallway and CCTV room environments with doors, windows, and torn-wall assets
- Designed and implemented the door-opening mechanic, its animation, and the character walk cycle

Projects

Carrom Legends **[Play Store]** **June 2026**
Unity | Android Game *Published*

- Solo-developed and published a 4-player mobile carrom game on Google Play (2,500+ downloads), covering gameplay, UI/UX, audio, testing, and store release
- Built event-driven gameplay systems and a rule-aware bot AI that ranks shots by distance and varies its choices to avoid repetitive play

Dynamic NPC Behavior System **[LinkedIn Post Video]** **January - April 2025**
Unity | PC | Team of 6 *Diploma Final Year Project*

- Led gameplay integration across a 6-person team, linking AI dialogue to NavMesh movement, animations, and inventory
- Architected a modular Unity framework of 6 decoupled systems (dialogue, interaction, animation, navigation, world awareness, inventory) using ScriptableObjects and event channels

Spark Shift **[Itch.io Page]** **January 2026**
Unity | PC | Team of 2 *GENESIS 5 Game Jam Submission*

- Co-developed a 2D cyberpunk puzzle game with 5 handcrafted levels and a risk-based wire-connection mechanic
- Implemented puzzle logic, progression unlocks, and reactive audio and VFX feedback

Type to Survive **[Play Online]** **February 2026**
Three.js | Web | Team of 2 *GDGC Tech Fest*

- Built a 3D browser typing-runner where WPM and accuracy are tuned into character speed, with asymmetric acceleration and anti-exploit accuracy weighting
- Used object pooling to run an endless Three.js environment, and shipped it with a leaderboard at a live college Tech Fest, played by 50+ students

Skills

- **Engines & Languages** - Unity (2D, 3D, VR/XR), C#, JavaScript (Three.js), C++, Python
- **Tools & Technologies** - Git/GitHub, Meta SDK, Unity XR Interaction Toolkit, Google Play Console

Certifications & Achievements

- Volunteer, Google Developer Groups on Campus (GDGC) - built games for the college Tech Fest
- Zonal Carrom Winner, Inter Engineering Diploma Students Sports Association (IEDSSA), 2025
- Generative AI Certification, LinkedIn Learning (July 2023) - **[Credential]**
